**ASSEMBLY TIPS**

*Please read before beginning assembly!

To avoid damaging furniture perform the assembly of your Loll furniture on a clean soft surface like a blanket, carpet, or the flattened cardboard box the furniture was shipped in. Components should not be unnecessarily forced together! If it seems parts aren’t fitting together you likely have something wrong and you should reread the instructions to ensure you are aligning the proper components.

**BLOCK & BOLT INSTALLATION**

Insert bolts through countersunk hole side of blocks as shown below.

**DAMAGED PRODUCT**

If your piece of furniture requires “Blocks” for assembly one side may have multiples of the materials that are wrong. A good indication is if you can see a lot of the wood or it can be removed. If you can’t muscle the bolt any tighter, it’s virtually impossible to over tighten by hand. We do not recommend using an electric drill with a cord and without a clutch to install bolts in inserts as you can easily overtighten and damage the product. All bolts come standard with a thread coating to reduce bolts loosening after assembly while still allowing removal and reuse of the bolt. Start all bolts by hand, with the Allen Key, or the Loll Tool and tighten firmly until parts are drawn tight together and you can’t muscle the bolt any tighter. It’s virtually impossible to over tighten by hand. Watch the assembly videos at www.lolldesigns.com/videos for even more information and visual aids. If you have more questions please contact your Loll Sales Associates or Customer Service for support at 877.740.3387. A Pro Tool Kit can also be purchased from Loll for multi piece assembly jobs.
