ASSEMBLY INSTRUCTIONS

1. ASSEMBLE SIDES & BRACES
   - Fit Braces with Left Side cut outs. Place Lock Blocks in the Braces cut outs, insert bolts through the blocks into Left Side threaded holes and finger tighten. Repeat step to attach Right Side.

2. ATTACH SEAT
   - Fit Seat cutouts (decal towards back) with short tabs of assembled chair sides. Attach using Lock Blocks and bolts, finger tighten.

3. ATTACH BACK
   - Fit Back cutouts with long tabs of chair sides. Attach using Lock Blocks and bolts, finger tighten.

4. ATTACH HEAD
   - Fit Head cutouts with top tabs of chair sides. Attach using Lock Blocks and bolts, finger tighten.

*It is very important that you finger tighten all bolts into inserts to ensure that you do not cross-thread bolts and inserts before tightening. It will also be easier if you wait to tighten bolts until you have all bolts installed and the piece completely assembled. This will allow for more movement of individual pieces and help in aligning holes with inserts. Use the Allen Tool provided to finish tighten bolt until snug.

*Please read assembly Assembly Tips first. Complete assembly by securely tightening all bolts with provided wrench.
**INCLUDED HARDWARE**

- **1" BOLT**
  - **COUNT**: 14

- **5/32˝ ALLEN WRENCH**
  - **COUNT**: 1

**INCLUDED PARTS**

**TIPS**

- **Please read before beginning assembly!**

To avoid damaging furniture, perform the assembly of your Loll furniture on a clean, soft surface like a blanket, carpet, or the flattened cardboard box the furniture was shipped in. Components should not be unnecessarily forced together! If you should reread the instructions to ensure you are aligning the proper components. If your piece of furniture requires "Blocks" for assembly one side may have protective film on it. This surface is hidden after assembly so the film can remain on the block or it can be removed. Use a Cordless Screw Gun if you have one and know how to use it. Set the clutch setting at medium torque. We do not recommend using an electric drill with a cord and without a clutch to install bolts in inserts as you can easily overtighten and damage the product. All bolts come standard with a thread coating to reduce bolts loosening after assembly while still allowing removal and reuse of the bolt. Start all bolts by hand, with the Allen Key, or the Loll Tool and tighten firmly until parts are drawn tight together and you can’t muscle the bolt any tighter. It’s virtually impossible to overtighten by hand. Watch the assembly videos at www.lolldesigns.com/videos for even more information and visual aids.
